PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/645,889

Applicant(s)

COPPERT, MICHAEL P.

Examiner

Mark P. Francis

Art Unit

2193

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 August 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 8,10-18,24-33 and 39-48 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 8,10-18,24-33 and 39-48 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

1. This action is responsive to the amendment filed August 08, 2007.
2. Per applicants' request, claims 8,10,13-14,18, 24-33, and 39-48 have been amended.

Response to Amendments

3. The 35 U.S.C. 101 Non-Statutory rejections of claims 13-18, 34-37, and 39-48 are withdrawn in view of applicant's amendment.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
5. A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
6. Claims 8,10-18, 24-33, and 39-48 are rejected under 35 U.S.C. 102(e) as being anticipated by Luzzi. (U.S. Pat 6,321,263)

Independent claims

With respect to claims 8 and 13, Luzzi discloses a system for monitoring software, comprising:

a central computer;(Col 12:5-15, "...a remote central repository...")

Art Unit: 2193

a monitoring apparatus installed in the central computer;(Col 15:15-25, "...a monitored application program..."), wherein the monitoring apparatus includes a message receiver to receive a first message from a first site,(Col 14:10-17, "...the timer mechanism...on the initial service request...") the first message including a first value for a first metric,(Col 14:19-25, "...availability and response time are key metrics...") a tester to determine if the first value is acceptable,(Col 14:64-67, "...the probe 201 further performs threshold comparison operations...")

and an alerter configured to provide an alert if the first value is not acceptable; (Col 15:1-10, "...an alert signal is generated...")

a first computer;(Col 12:10-15, "...client computer) a first probe installed in the first computer; (Col 12:10-15, "...the AMA probe...")

and a network connecting the central computer and the first computer. (Col 12:10-16, "...and remote on the network...")

With respect to claim 24 and 39, Luzzi discloses a Computer-readable storage media containing a program to use a monitoring apparatus, the program comprising: (Col 15:5-20, "...AMA probe...")

Software to receive a message; (Col 14:10-17, "...the timer mechanism...on the initial service request...")

software to determine a first value for a first metric for a first site from the message;(Col 11:20-35, "...have exceeded such pre-defined performance criteria...")

Art Unit: 2193

software to determine a first value for the first metric for a site from the message; (Col 12:28-40, "...signaling the violation of pre-defined performance criteria...")

software to determine if the first value for the first metric for the first site is acceptable;(Col 11:28-35, "...A determination that one of these pre-defined performance criteria has been violated...")

and

if the first value for the first metric is not acceptable,(Col 14:64-67, "...the interface-based predetermined performance criteria have been violated...") software to display an alert that the first value for the first metric is not acceptable.(Col 12:35-43, "...an alert signal will be generated by the AMA probe and forwarded to the alerting mechanism...")

Dependent claims

With respect to claim 28, the rejection of claim 13 is incorporated and further, Luzzi discloses that determining if the first value for the first metric is acceptable includes determining if the first value for the first metric is within a range of acceptable values. (Col 11:14-30, "...pre-defined performance criteria may include such metrics as maximum....")

With respect to claim 10, the rejection of claim 8 is incorporated and further, Luzzi discloses that the tester includes: a plurality of filters, each filter determining a range of acceptable values for a metric; (Col 11:14-34, "...the pre-defined performance criteria...")

Art Unit: 2193

and a selector to select the first filter from the plurality of filters based on the first metric in the first message. (Col 11:14-30, "...pre-defined performance criteria may include such metrics as maximum....")

With respect to claim 11, the rejection of claim 10 is incorporated and further, Luzzi discloses that: the plurality of filters includes at least one filter defining a range of acceptable values for the first metric associated with a site; (Col 11:14-30, "...pre-defined performance criteria may include such metrics as maximum....")

and a selector to select the first filter from the plurality of filters based on a first site in the first message. (Col 11:14-30, "...pre-defined performance criteria may include such metrics as maximum....")

With respect to claim 12, the rejection of claim 8 is incorporated and further, Luzzi discloses comprising a log, the log including an entry corresponding to the first message. (Col 12: 28-35, "...signaling the violation...")

With respect to claim 14, the rejection of claim 13 is incorporated and further, Luzzi discloses the system further comprises: a second computer; (Col 12:1-15, "...on the server computer...")

and a second probe installed in the second computer; (Col 12:1-15, "...including the AMA probe...")

Art Unit: 2193

and the network connects the central computer and the second computer. (Col 12:1-15, "...and remote on the network...")

With respect to claim 15, the rejection of claim 13 is incorporated and further, Luzzi discloses that the first computer includes a software package; (Col 10:5-15, "...by monitoring an application program...")and the first probe monitors the software package. (Col 15:5-20, "...AMA probe software...to a monitored application program...")

With respect to claim 16, the rejection of claim 13 is incorporated and further, Luzzi discloses that the first computer includes a database; (Col 12:10-20, "...central repository...")and the first probe monitors the database. (Col 12:16-27, "...an multiple monitoring implementation,...")

With respect to claim 17, the rejection of claim 13 is incorporated and further, Luzzi discloses that:

and the probe includes: a first sensor to capture a first value for a first metric; (Col 12:28-40, "...signaling the violation of pre-defined performance criteria...")

and a message generator operative to send a first message to a central site, the message including the first value. (Col 12:60-67, "...an application availability-based alert signal...")

With respect to claim 18, the rejection of claim 13 is incorporated and further, Luzzi

Art Unit: 2193

discloses that the first computer includes an e-mail server to generate a message from the first probe to the monitoring apparatus. (Col 11:45-55, "...the network address of the target server...")

With respect to claim 25, the rejection of claim 24 is incorporated respectively and further, Luzzi discloses comprising, if the first value for the first metric is acceptable, logging the first value for the first metric. (Col 4:35-45, "...program metrics...")

With respect to claims 27 and 42, the rejection of claims 24 and 39 are incorporated respectively and further, Luzzi discloses that determining if the first value for the first metric is acceptable includes comparing the first value for the first metric with at least one acceptable value. (Col 11:14-30, "...pre-defined performance criteria may include such metrics as maximum....")

With respect to claims 28 and 43, the rejection of claims 24 and 39 are incorporated respectively and further, Luzzi discloses that the software to determine if the first value for the first metric is acceptable includes software to determine if the first value for the first metric is within a range of acceptable values. (Col 11:1-28, "...A determination that one of these...")

With respect to claim 29, the rejection of claims 24 is incorporated and further, Luzzi

Art Unit: 2193

discloses that receiving a message includes: accessing the first value for the first metric by a probe; (Col 18:15-25, "...for accessing data stored in the repository...")
generating the message by the probe; (Col 11:28-40, "...to generate an alert signal...")
and sending the message to the monitoring apparatus by the probe. (Col 15:5-20, "...to a monitored application program...")

With respect to claims 30 and 45 the rejection of claims 29 and 44 are incorporated respectively and further, Luzzi discloses that sending the message includes: delivering the message to an e-mail server by the probe; (Col 18:15-25, "...the session established between...")
delivering the message to the monitoring apparatus by the e-mail server. (Col 12:28-43, "...an alert signal will be generated by the AMA probe...")

With respect to claims 31 and 46 the rejection of claims 29 and 44 are incorporated respectively and further, Luzzi discloses that accessing the first value includes accessing a software package by the probe. (Col 10:5-15, "...by monitoring an application program...")

With respect to claims 32 and 47 the rejection of claims 19 and 44 are incorporated respectively and further, Luzzi discloses that accessing the first value includes accessing a database by the probe. (Col 18:15-25, "...for accessing data stored in the repository...")

With respect to claims 33 and 48 the rejection of claims 29 and 44 are incorporated respectively and further, Luzzi discloses that generating a message further includes generating the message by the probe, the message including the first value for the first metric and an identifier for a site of the probe. (Col 11:28-40, "...to generate an alert signal...")

With respect to claim 40, the rejection of claims 39 is incorporated and further, Luzzi discloses if the first value for the first metric is acceptable, software to log the first value for the first metric. (Col 11:1-28, "...A determination that one of these...")

With respect to claim 42, the rejection of claims 39 is incorporated and further, Luzzi discloses that the software to determine if the first value for the first metric is acceptable includes software to compare the first value for the first metric with at least one acceptable value. (Col 11:15-35, "...The pre-defined performance criteria may include...")

With respect to claim 44, the rejection of claims 39 is incorporated and further, Luzzi discloses that the software to receive a message includes:
software to access the first value for the first metric by a probe; (Col 11:20-35, "...have exceeded such pre-defined performance criteria...")

software to generate the message by the probe; (Col 12:28-40, "...signaling the violation of pre-defined performance criteria...") and software to send the message to the monitoring apparatus by the probe. (Col 11:28-40, "...to generate an alert signal...")

Response to Arguments

7. Applicant's arguments filed on August 08, 2007 have been fully considered but they are not persuasive. Following is the Examiner's response to Applicants' arguments.

With respect to claims 8, 10-18, 24-33, and 39-48 Applicant essentially argues that Luzzi et al. does not anticipate the features of this claim because Luzzi et al. does not teach or suggest the features of receiving a message from a first site and sending an alert message if the value in the message is not acceptable.

In response, the Examiner disagrees, Note Col 5:24-40, it is here that Luzzi teaches that a set of parameters or probe configuration information are established at the client computer in recording the performance of an application program. The client computer probe is configured to send service requests or messages to the server computer to request the performance of the application services by the application program that resides on the server computer that is different from the client computer. In addition, the Examiner Notes Col 11:14-35, it is here that Luzzi discloses that the AMA probe determines whether any pertinent elements of the completed transaction including the service request and the corresponding response have exceeded any such

pre-defined criteria or guidelines and if so the AMA probe will generate an alert signal that will be sent to the alerting mechanism. Therefore, Luzzi does teach

With respect to claims 1,27,43,46, and 48, Applicant argues that Derrick does not teach that the CPU is programmed to perform instruction bundling or rebundling.

The Examiner disagrees, Derrick discloses that the CPU is able to execute instructions in a first instruction set and has the ability to execute a control program to communicate with code translator to control translation of code sequences.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark P. Francis whose telephone number is (571)272-7956. The examiner can normally be reached on Mon-Fri 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai T. An can be reached on (571)272-3756. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
